HB160

The HB-160A is a highly durable and efficient vehicle barrier system, featuring a 160-watt power rating and a 3-meter boom length. Built for secure access control, it delivers smooth operation with a fast 3-second response time. Equipped with anti-ram capabilities, the system effectively deters unauthorized vehicle entry. Its robust construction ensures resilience in various environments, meeting industry-standard security requirements. Additionally, the HB-160A offers customization options, including adjustable barrier arm lengths, control mechanisms, and aesthetic finishes, making it a flexible solution for managing access to restricted areas. This vehicle barrier combines reliability with advanced technology to meet diverse site needs.

Features

- Multiple control options
- Auto close and bounce-up to prevent damage.
- Adjustable direction and speed for flexibility.
- Protective measures: anti-wind, motor overheat prevention, anti-surge, thunder-proof.
- Durable, waterproof housing for outdoor use.
- Photosensitive sensor for intelligent LED control.
- Opening-first function for improved access rate.
- Standard electric interface for easy system integration.

Specifications

Power Supply	220V±10%/50HZ,60HZ
Motor Power	AC220V,160W
Advertising Plate	82 x 830mm
Advertising Screen	440 x 920mm
Operational time	3s~6s
Boom Length	3m
Housing Dimension	450 x 331 x 1180mm
Led strip supply	DC12V
Working Temperature	-30°to 80°
Remote Control	≤30m
Protection Grade	IP54
